

ContinuumAR – Zoom Documentation

Integration Description

The ContinuumAR app by Sequoia Applied Technologies provides a streamlined and efficient solution for front line workers to get critical information in the field.

The zoom integration lets you communicate with the ContinuumAR App installed on the AR device from any Zoom client. This lets all the zoom meeting functionality to be used to quickly communicate seamlessly with the AR device.

For any questions regarding the integration reach out to continuumarsupport@sequoiaat.com

Install Instructions

You can download the app using this direct download link:

<https://confapp.sequoia.at/continuumAR/download/ContinuumAR.apk>

The ContinuumAR app utilizes a Zoom feature where a non-logged in user can join or start a scheduled meeting without needing Zoom credentials

This way you can seamlessly join meetings with the AR device and contact the technicians and resource persons seamlessly.

Uninstall instructions

You can uninstall the ContinuumAR app from
Settings > Apps & Notifications > See all apps > Continuum AR

As only non-logged in features are used removing the app from your Zoom account is not necessary.
